

WINTER READY CAR CHECKLIST

from Seventh Avenue Auto

1. CHECK YOUR TIRES

- ☐ Check the tire treads.
- ☐ Use the Penny Trick - place a penny inside your tire tread and see how much of Lincoln's head is visible. If you can't see all of the head when it's turned upside down, your tread is too worn.
- ☐ Feel the inside of your tire for wear as well - this could indicate your alignment is off.

2. EXAMINE FLUIDS

- ☐ Check your reservoir containers - is anything leaking? Do they appear low?
- ☐ Take a picture of the reservoir if you need to ask what fluid it is for.

3. CHECK BLOWER FANS + HEATER.

- ☐ Turn on the controller to heat on your dash and crank it to high. Is it blowing hot air? Is the air flow strong?

4. CHECK WINDSHIELD WIPERS.

- ☐ Turn on your windshield wipers, and check the wiper arms, blades, and motor.
- ☐ Check your glass for any cracks - these will only get worse with cold temperatures.

5. HEADLIGHTS + MIRRORS

- ☐ Inspect them for any visible damage (cracks, any lights not working).

6. INSPECT DOORS AND TRUNK.

- ☐ Open and close all the doors to your vehicle, as well as your tailgate or trunk to ensure they are functioning properly.
- ☐ If a lock seems sticky, spray it with some lubricant to see if it can loosen any sticky parts.
